How to Reach Our Nurseries

THE WESTON NURSERIES are located in the southern part of the town of Weston on Route 30. Route 30 is the Boston to Framingham route over Commonwealth Avenue. The Main Nurseries are at 85 Winter Street which is the first public road on your left after crossing Wellesley Street.

From the Boston-Worcester Turnpike take the Weston Road at Wellesley for 2½ miles and turn left on Brown Street at the new aqueduct.

Three early eighteenth-century houses greet all visitors to Weston Nurseries. They are reproduced here with other important land marks because, in addition to their historical and architectural value, they serve as most convenient guides to the different nurseries on our 200 acres now under cultivation.

Sunset House, shown above, was originally the old Leadbetter Home. It was purchased by us in the Spring of 1940, and as far as was possible, restored to its original condition. Surrounding grounds have been properly graded and planted. It is now known as the *Sunset House* because it is situated to the West of the Main Office and presents a beautiful picture across the open fields in the glow of the late afternoon. This house marks the newer section of the Nursery which is being planted with the better varieties of Evergreens.

**EVERGREEN GROUND COVERS**

In our rugged New England countryside the home-owner often has a problem with banks or shady places near the house where it is impossible to make a satisfactory lawn. The various evergreen ground covers offer the best solution to this problem. The different low-growing *Junipers* will transform a sunny bank. Although the *Pfitzer Juniper*, *Sargent Juniper* and *Andorra Juniper* are all low and spreading in form, the difference in color and texture of the foliage makes a most attractive picture when they are used in combination. The *Arctostaphylos* or *Bearberry* and *Pachistima* may be used in the same location and the foliage has a bronzy tone in the Fall. For shady places *Pachysandra*, *Vinca* with its blue flowers, or *Partridge Berry* or *Wintergreen* with red berries in the Fall, make a lovely evergreen carpet. The different varieties of Evergreen *Euonymus* are suitable for ground covers especially the *Euonymus colorata* as it grows rapidly in either sun or shade and has brilliant foliage in Autumn and through the Winter months.

The Deacon Jones House was added to the Weston Nurseries' Properties in 1933. This attractive old Colonial home was in all probability built by Deacon Abraham Jones in the year 1765. Its panelled walls and beautiful fireplaces in every room, have been carefully restored. This house is situated to the Northeast, at the junction of Wellesley Street and South Avenue. The protected hillside lands at the rear have proved most suitable to the growing of Rhododendrons and other broad-leaved evergreens.

NATIVE TREES AND SHRUBS

The interest taken in the use of our native plants for home planting is increasing rapidly. We see the increase in highway plantings, park developments and flower shows as a definite source of beauty. Besides beauty, the factors of soil and climatic adaptability are all important to the hardiness and permanence of such plants. Birds are particularly attracted to the native plants in which they have found food and haven for centuries. Native plants have become more available in recent years through the foresight and development of plant propagation by the nurserymen. Plants dug from the wild have often proved unsatisfactory in transplanting, besides being a waste of our natural beauty. Many of these shrubs have lovely blossoms in spring and summer and bright berries in the fall; others contribute to the glory of our autumn foliage. The *Flowering Dogwood*, *White Birch*, *Maple*, *Hemlock*, *Shad*, *Pine*, *Redcedar*, and *American Elm* are trees that tell the story of New England. Shrubs such as *Winterberry*, *Viburnum*, *Sweet Pepperbush*, *Azalea*, *Laurel*, *Elderberry*, *Sumac*, *Benzoin*, and *Highbush Blueberry* are some favorites that are available at our nurseries.

The Old Farm House, formerly known as the Lieut. Samuel Train House, from its first owner and probable builder in the year 1740, derives its name from the fact that its sixty-two acres of rich farm lands were under continuous cultivation for over a century. There are some grounds for thinking that this house was used as an inn, about the year 1802, for travelers en route by stage or horse-back to Plymouth, Boston or Worcester. Today these same rolling acres, with their diversity of soils, elevations, and exposures, are ideally adapted to the growing of our large stock of flowering and ornamental shrubs of every type and variety.

LILACS IN NEW ENGLAND

It is believed that the first Lilacs planted on American soil were imported from England in 1750 by Governor Wentworth of New Hampshire. In 1919 the Lilac was voted the flower of New Hampshire. Because of its hardiness, fragrance and beautiful clusters of flowers it always has been a favorite shrub to beautify New England homes. In colonial times it seems to have been the only shrub used for this purpose. The lone groups of purple Lilacs seen along our country roads to-day have grown for many years, with no care except as passersby have broken off clusters of the lovely blossoms, and remain today as the sole monument to the early settlers. Great improvements have been made in the last half century on the old *Syringa vulgaris* or Common Purple Lilac. Now we have Hybrid varieties in clear blue, red, and all shades of purple and lavender as a result of the slow difficult work of hybridization by Nurserymen and plant lovers all over the world. Every New England home should have a collection of Lilacs for its historical association as well as for the beauty and fragrance of this lovely shrub.

The Pond shown in the above illustration was built in the summer of 1940 not far from the Old Farm House. At the far end of the nursery fields it contributes an added touch of interest and beauty. One of these fields overlooking the pond is entirely given over to Hybrid Lilacs. During a period of fifteen years Weston Nurseries has succeeded in developing a collection of over seventy-five varieties of this popular flowering shrub.

To the home garden enthusiast probably the most popular spot on our Nursery lands is occupied by the *Bulb House*, *Greenhouses* and *Sales Yard*. The Bulb House was designed and built for the storage and sale of Dutch Bulbs. In season, the small gardens in front of the Bulb House are radiant with Roses — beds of Roses and climbing Roses. The curvilinear Greenhouse, completed in the winter of 1940, is used for the propagation of various kinds of Nursery stock and the growing of potted Chrysanthemums. Visitors to Weston Nurseries, even on days when they are not buying, love to stroll through our Sales Yard and enjoy its wide and varied offerings of dormant and potted Roses, and its attractive display of trees and shrubs.

In order to serve a rapidly increasing clientele it became necessary to build, in 1935, the spacious *Packing Shed* shown above. It was designed by Mr. Clark Merrick, architect, and is of steel frame construction. The weather vane is of special interest as a replica of the famous horse, *Smuggler* — who in 1876 was known as “the King of the trotting turf.” This brown or very dark bay stallion, bred in Columbus, Ohio, was later bought by Col. H. S. Russell of Milton, Massachusetts, for \$40,000. He was the fastest pacer of his day.

The *Packing Shed* is located on the South side of the Sales Yard where it marks our five-acre Perennial Nursery. Here you will find one of the largest collections of hardy Perennials in New England.

Rock Garden Plants and Perennials

The plants are 25c each, \$2.20 per 10, and \$18.00 per 100 unless otherwise marked. 5 or more of one variety will be priced at the 10 rate, 25 or more at the 100 rate.

The asterisk (*) indicates varieties particularly well adapted for the Rock Garden.

The ultimate height of the plant is given in feet and inches.

The approximate time of flowering is given in months.

Miscellaneous Items

Annuals

We would like to advise our customers that, in addition, to the plants listed in this catalog, we also grow and sell a wide variety of the best annuals. A separate list of these plants is available for anyone who is interested.

Aquatic Plants

Water Lilies, in all colors, and other aquatic plants are available from May 1st throughout the season. We have been very successful in supplying our local customers with these plants, in tubs or pots, in full bloom throughout the summer.

Bulbs

In the autumn we handle the best varieties of Hardy Bulbs such as Tulips, Narcissi, Lilies, and miscellaneous small Bulbs. A separate list of these bulbs is also available at the Nursery.

Cut Flowers

Through the summer and fall we can supply cut flowers. Our specialties are Delphiniums, Chrysanthemums both cut and potted, and Gladioli of which we also sell the bulbs in the spring.

Fertilizer and Peat Moss

We sell fertilizers including Bone Meal, Bovung, Driconure, Emseco, Loma, and Vigoro in 100 lb. bags or smaller quantities, and well-rotted manure in truck loads or bushel bags. We also supply Peat Moss at regular market prices.

Grass Seed

We carry F. H. Woodruff and Sons Grass Seed in the various types and qualities.

Landscape Service

We shall be glad to help you with plans and estimates for a perennial border, rose garden, rock garden, a garden pool, or any other type of garden in which you are interested, and are, also, well-equipped to carry out the work.

Conditions of Sale

IT is to our own interest to see that only good and correctly labeled plants leave the Nursery, but we give no guaranty, express or implied, as to description, growth and success of any stock we sell, for it depends on correct planting, proper soil, weather conditions, and the general care of the plants.

We accept all orders upon the condition that they shall be void should injury befall the stock from frost, fire, hailstorm, or other causes over which we have no control.

Any errors made by us will be gladly rectified if notice is given within ten days after receiving the stock. If any plants are found to be misnamed, we will replace them the next planting season.

We sell five plants of the same variety at the rate of ten; 25 plants at the rate of 100. Specimen plants at special prices.

All parcel post, express or freight charges are paid by the purchaser.

A certificate of State inspection for freedom from injurious insects or diseases on our plants will go with every order.
